

LUTZ | ABEL maximizes efficiency in handling mass lawsuits

How the major law firm LUTZ | ABEL fully automated its process workflows with JUNE's Legal AI & Automation.

JUNE Case Study

AT A GLANCE

The renowned German commercial law firm LUTZ | ABEL was faced with the challenge of managing an enormous volume of documents as part of a high-profile mass litigation case.

With JUNE Legal AI & Automation, the processing and analysis of the information could be largely automated, thus maximizing workflow efficiency.

As a result, the firm benefits from high-quality litigation handling that is simultaneously time- and cost-saving.

RESULTS AND KPIS

250

lawsuits processed automatically per day

- AI automatically recognizes and assigns beA documents.
- Delivery to courts occurs fully digitally
- Consistent data as an efficiency booster
- Lawyers can concentrate more on core / strategic legal work.
- Time, costs and personnel requirements significantly reduced

CHALLENGES

Mass investor lawsuits

- High volume of similar lawsuits - banking and capital markets law
- Manual review and evaluation of thousands of documents
- Specialist staff tied up with routine and reporting tasks

OBJECTIVES

A uniform database and a high degree of automation were crucial. Therefore, the need for a software solution that could largely automate routine workflows in this mass processing procedure.

Automation of routine workflows

Collect case-relevant information in a central, digital database

Automatic detection and extraction of relevant information

WHY CONVENTIONAL SOLUTIONS FAILED

Traditional legal software failed to impress.

- ✗ Too inflexible for complex mass processes
- ✗ No AI-based data analysis
- ✗ No automated extraction and structuring of content

WHY THEY CHOSE JUNE

- ✓ AI-powered features for intelligent workflows
- ✓ Tailored adjustments to law firm processes
- ✓ Dedicated implementation team

"The experts from JUNE showed great commitment and provided exemplary support during the implementation in our offices. [...] This made it possible to build trust with our employees and convince them of the wide range of functions."

– Nadine Zech, Lawyer banking and capital markets law

JUNE IN PRACTICE

Maximum efficiency and a high degree of automation

Following successful implementation and go-live, JUNE's Legal AI & Automation solution quickly demonstrated its advantages: The software paves the way for significantly increasing the efficiency of the entire litigation process and highly automating workflows in mass proceedings. For example, JUNE reliably identifies documents received through various channels, such as the special electronic mailbox for lawyers (beA), postal mail, or email, and recognizes their content using artificial intelligence (AI). This allows documents to be specifically assigned to the responsible lawyers and distributed accordingly.

Additionally, JUNE supports the drafting of legal documents. Standardized and time-sensitive documents, such as individual notices of defense to the competent court within the statutory two-week period, are generated automatically. These documents can then be sent to the court quickly and easily via digital channels. This is made possible by the seamlessly integrated interface to the special electronic mailbox for lawyers (beA).

"We benefit greatly from the consistent use of beA for sending documents. With a volume of 250 new legal cases per day, we would quickly reach our limits if documents were sent manually."

– Nadine Zech, Lawyer banking and capital markets law

Valuable support is also provided by the reporting tool, which is also an integral part of JUNE.

"Our client in the current mass litigation places particular emphasis on comprehensive and detailed reports. With the help of JUNE, we can present virtually all facts without gaps – even when there were previously no standardized options for certain combinations."

– Nadine Zech, Lawyer banking and capital markets law

TIME, EFFORT AND COSTS SAVINGS AT SCALE

As a result, the increased efficiency provided by JUNE becomes a key factor that leads to significant savings in time, effort, and costs. This allows the LUTZ | ABEL team to successfully handle numerous lawsuits with a comparatively small staff, maintaining a high level of quality despite the large volume of cases. Accordingly, clients are also enthusiastic about the software. This also applies to lawyers at cooperating firms, who benefit from JUNE's read-only access and report view.

Based on these positive experiences, the firm plans to continue using JUNE in the future and intends to further expand its collaboration with the software providers and utilize additional features.
